The Late Orlando Harrison

HARRISONS' NURSERIES
BERLIN, MARYLAND

ARRISONS' NURSERIES, J. G. Harrison & Sons, Props., was founded in 1884 at Berlin, Maryland, by the late Joseph George Harrison. His two sons, Orlando Harrison and George A. Harrison, were taken in as partners in 1885 and 1886, respectively, and the splendid growth and huge development of this business was due mainly to the foresight, energy and high integrity of the sons of the founder.

It was found that our soil and climate was particularly adapted to the growth of nursery stock and Harrison grown trees and plants became popular with the planters from the very beginning. On account of the high grade and quality of our products and our fair dealings, with increased sales annually, there was necessitated an annual growth which this business has shown from year to year, and which at the present time comprises several thousand acres, consisting of all kinds of fruit trees, shade trees, evergreens, shrubbery, hedge plants, small fruits, bulbs, and in short, a general line of nursery stock, also one of the largest aggregations of commercial peach and apple orchards in the eastern part of the United States.

The business is now owned and operated by the devisees of the late Senator Orlando Harrison, being G. Hale Harrison, Henry L. Harrison, Orlando Harrison, and John L. Harrison, and also by the heirs of the late George A. Harrison, being Joseph G. Harrison, Burbage Harrison, Mrs. Katherine Harrison Davis, and Mrs. Eunice Harrison Langeler.

We deeply appreciate the business which our old customers have favored us with annually, and to our new and prospective customers, we extend to you a personal welcome to join the ranks of the thousands of satisfied customers throughout the United States and Canada.

The third generation of Harrisons sincerely realize the huge responsibility and pledge themselves jointly and severally to the best of their ability to fulfill the traditions of this old established forty-five year old Nursery, and we hope that we may be able to do even greater deeds than our worthy ancestors.

We solicit your patronage and extend a hearty invitation to visit us at any time while on the Eastern Shore of Maryland.

> By G. HALE HARRISON, Mgr. Sales and Treas.

## HARRISON GROWN EVERGREENS

All evergreens will be balled and burlapped, that is, carefully dug with the proper amount of soil about the roots and wrapped in burlap which is securely sewed. These prices include this service.

# ARBORVITAES

American Arborvitae.

American Arborvitae (Thuja occidentalis)

The largest seller of all Arborvitaes. Erect, pyramidal habit, bright, green foliage, dense from ground up. Rapid grower. 1 to 9 10 to 29

The upright honeysuckles have pretty, bright flowers and later showy berries throughout the fall. Should be used in shrub groups.
Fragrant Honeysuckle (Lonicera fragrantissima) Early pink and white fragrant flowers.  1 to 9 Shrubs Shrubs Shrubs 4 to 3 ft
Japanese Bush Honeysuckle (Lonicera morrowii) Early white flowers, followed by red berries.  2 to 3 ft. \$.60 \$.50 each 3 to 4 ft
Pink Tartarian Honeysuckle (Lonicerà grandiflora rosea) Abundance of bright pink flowers. Very noticeable. 2 to 3 ft. \$.50 each 3 to 4 ft
Red Tartarian Honeysuckle (Lonicera tartarica rubra) Crimson flowers, bright red fruit. 2 to 3 ft

## HYDRANGEAS

Among the best and most popular shrubs, valuable for their wealth of late summer blooms. Thrive at seashores as well as other locations.

#### Hydrangea (Paniculata Grandiflora) (Pee Gee) (Large flowered)

Large flowers, first snowy white, then pink, then reddish bronze and green. Blooms from middle summer until fall. Best selling variety of Hydrangeas grown.

# FRUIT TREES

One-year Budded Apple Trees Are Popular with the Commercial Orchardists.

# HARRISON GROWN APPLE TREES

Harrison Grown apple trees are budded direct from bearing commercial orchards of superior strains on French Grown apple seedlings. Harrison trees will bear sooner and bear heavier than the average trees all of their lives. Our favorable soil and climate enables us to produce larger, smoother and better quality trees than can be grown in the average nursery sections.

SEE REDUCED PRICES FOR 600 to 3000 TREES OVER 3000 TREES WRITE FOR SPECIAL PRICES

CAN BE ASSORTED APPLES, PEACHES, CHER-RIES, PEARS OR OTHER FRUIT TREES.

BALDWIN—Winter, large, bright red, yields big crops, good keeper. There are more bearing trees of Baldwin in New York, Northern Pennsylvania, the New England States and Canada than any other commercial variety.

Ben Davis—Winter, large, extra good color, one of the best keepers. Popular as an export apple to Europe and South America.

Benoni-Summer, red, productive.

Cortland-Fall, red, new variety. Cross between Mc-Intosh Red and Ben Davis.

DELICIOUS—Winter, red, large, very highly flavored. One of the most popular and highest priced apples grown. Be sure to include in your commercial orchard.

We Select Our Buds from Our Own Bearing Orchards

#### APPLE TREES (Continued)

- Duchess (Duchess of Oldenburg)-Summer, large, red striped, heavy bearer.
- Early Harvest-Summer, medium size, yellow.
- Fameuse (Snow)-Fall, medium size, crimson skin with white flesh. Popular in Canada.
- GANO (BLACK BEN DAVIS)—Winter, bright red, medium to large, very good keeper, prolific bearer. Popular export variety. Has excellent shipping qualities.
- Gravenstein-Early fall, large streaked and splashed with red.
- GRIMES GOLDEN-Fall, medium size, yellow, heavy Virginia and Virginia. The best pollinizer for Stayman Winesap and many other varieties.
- Hubbardston (Hubbardston None-Such)-Winter, large, red striped, bears well every year.
- JONATHAN-Fall, bright red, medium size, excellent quality.
- King David-Fall, very dark red, medium size, good flavor.
- King (King of Tompkins County)-Winter, red. large. Grown mostly in New York.
- Liveland Raspberry-Summer, pinkish red stripe, medium size.
- Mammoth Black Twig-See Paragon for description.
- McINTOSH RED-Fall, red, large, flesh white, juicy and the best flavored apple grown. McIntosh Red is the highest priced apple on the leading American markets, Every commercial orchard should include a large planting of McIntosh.
- Maidens Blush-Summer, large, red blush.
- Nero-Winter, bright red, large, extra good keeper, fine flavor.
- NORTHERN SPY-Winter, extra large, bright scarlet red with yellow markings. Good keeper, very desirable for cooking purposes and brings high prices on the markets. Thrives best in New England and other Northern States.
- North Western Greening-Fall, very large, greenish yellow, good shipper. Popular for baking.
- PARAGON OR MAMMOTH BLACK TWIG-Winter, extra large, dark red, one of the best keepers. Good flavor, fine shipper.

#### APPLE TREES (Continued)

- Red Astrachan-Summer, medium size, red striped, heavy bearer.
- ROME BEAUTY-Winter, extra large red, excellent late keeper, good flavor. Rome is a high priced apple and should be more extensively planted by the Eastern orchardists.
- Red June-Summer, medium size, red.
- Red Gravenstein-An improvement on the regular Gravenstein, with better and higher red color.
- RHODE ISLAND GREENING Winter, extra large greenish yellow. Should be included in all commercial orchards in New England and other Northern States. Fruit always in demand and brings good prices.
- Roxbury Russet-Winter, large, yellow brown russet. Best variety of all Russets.
- Smokehouse-Fall, large, yellow-green mottled with dull red, fine flavor.
- Stark-Winter, extra large, greenish yellow with red blush. Good keeper. Popular as a baking apple.
- STAYMAN WINESAP-Winter, large, bright red, extra good flavor, juicy and quality ranking with the best. Fine keeper and one of the most popular apples on the large Eastern markets, demanding high prices. Planted extensively in the East.
- Sweet Bough-Summer, pale vellow, large, tender, sweet,
- Wolf River-Winter, extra large, red.
- WILLIAMS EARLY RED-Summer, medium to large size, bright red, good quality. Best red summer variety grown and a real money-maker. All commercial orchards should include the Williams.
- Winter Banana-Winter, large, yellow with red blush.
- Wealthy-Summer, medium, red. Best summer export variety, very hardy and can be grown where any variety of apple thrives.
- WINESAP-Winter, medium size, dark red, well colored, highly flavored, one of the best and longest keepers. Popular box apple. Brings high prices during the late winter and spring months.

Harrison Grown Apple Trees are Known to be Dependable from Coast to Coast

#### APPLE TREES (Continued)

YELLOW TRANSPARENT—Very early summer, medium size, greenish yellow, very heavy bearer, always in demand for pie and cooking purposes on account of being the first early variety of any merit on the markets. It brings very high prices, especially when grown in Tennessee, Maryland, Delaware, Virginia, Illinois and Indiana.

Yellow Belleflower-Winter, large, yellow, good flavor.

YORK IMPERIAL—Winter, bright red, medium to large size, very heavy bearers, good quality, long keeper. The most popular export apple for European markets. One of the best money-makers. York Imperial should be planted in all commercial orchards in sections south of Central Pennsylvania.

## CRAB APPLES

Florence-Summer, carmine red, very hardy.

Hyslop-Crimson color, large crab apple.

Martha-Beautiful glossy yellow, good size, tart.

Transcendent—Best of all crab apples, good size, yellow skin, striped with red.

Whitney—Largest crab apple, smooth, glossy, green, splashed with red, good bearer.

#### LIST OF PEACH VARIETIES

Alexander-Very early, white.

Beer Smock-Late, yellow, freestone, high flavor.

BELLE OF GEORGIA (BELLE)—Mid-season, white, freestone, large size, extra fine flavor, good keeping qualities, prolific bearer. The best known white peach for commercial orchards. Always include Belle of Georgia in your plantings.

Berks Favorite-Late, white, new variety.

Bernard—Mid-season, yellow, juicy, rich, very productive. BRACKETT—Ripens about a week later than Elberta and fruit similar to Elberta, but of better flavor. Large size, freestone, yellow, highly flavored. The best commercial or family peach to plant so as to extend the period of ripening in which the Elberta is so popular. Good shipper, be sure to include in your plantings.

Captain Ede-Mid-season, freestone, yellow, large.

Cumberland—Early, semi-freestone, white—new variety. Crawford Early—Midseason, freestone, yellow, good quality, prolific bearer, one of the old-time favorites.

Champion—Early mid-season, white, freestone, very large—excellent home orchard peach.

CARMAN—Early, white, semi-freestone, medium size, heavy bearer, good red blush. Extensively planted, early commercial variety.

CRAWFORD LATE-Very large size, yellow, late freestone, high flavor.

Elberta Peaches

Late Senator Orlando Harrison and Late
George A. Harrison.

ELBERTA—The world's best money-making Peach. Be sure to plant heavy to Elberta. Buds cut from the nationally known Harrisons' twenty-seven-year-old bearing commercial Elberta orchard. This is the best strain of Elbertas known. Ripens middle of August. The old reliable peach, of which more are planted and from which more money has been made than from any other variety. The fruit is large to extra large; golden yellow, with brilliant shades of red; firm, juicy, rich, sweet. Tree vigorous, sturdy, hardy; thrives in widely differing localities. For many years Elberta has been the standard market Peach both in Southern and Northern markets, and it has a place in the estimation of commercial growers and the users of Peaches which will be hard to fill with any other variety: in fact, the Elberta is the one variety that every fruit-stand customer seems to know. No other Peach has ever been introduced which fills all the requirements of a commercial Peach with success as Elberta, in size, appearance and quality.

Cultivation in One of Harrisons' Nurseries, Famous Bearing Commercial Peach Orchards.

EARLY ELBERTA-Early mid-season, ripens about a week earlier than Elberta, yellow, freestone and somewhat similar to Elberta.

Engles Mammoth (Engle)-Late, large, yellow freestone, resembles Crawford Late.

Early Rose—Very early, white, cling, small to medium size, prolific bearer. The most popular new early variety in the Georgia commercial peach orchards.

Eclipse-Early, yellow, freestone, new variety.

Fitzgerald-Late, large, yellow, freestone.

Fox Seedling (Fox)-Late, large, white, freestone, good for canning.

Frances-Late, yellow, freestone, medium size.

Greensboro-Early, extra large, white, freestone, excellent for roadside markets.

Gold Drop-Late, very hardy, heavy bearer, medium size, yellow, freestone.

HILEY (Hiley Belle)-Early white, freestone, medium size, highly red colored, extra good flavor. Prolific bearer—one of its most striking characteristics is that it will withstand long shipments in refrigerator cars of a thousand or more miles. There are more Hiley trees planted in North Carolina, South Carolina and Georgia than any other white commercial variety.

Hill's Chili-Late, yellow, medium size, freestone, hardy.

J. H. HALE (HALE)-Mid-season, extra large, vellow H. HALE (HALE)—Mid-season, extra large, yellow freestone, fine flavor. Ripens about two or three days ahead of Elberta. Our Hales are propagated direct from the original strain, buds being cut from our own bearing commercial orchard. Hale is the most popular of all the new varieties and has been extensively planted in recent years. A few Elbertas should be planted along with Hale for cross-pollenization.

Iron Mountain-Late, white, freestone.

Kalamazoo—Mid-season, large, golden yellow, freestone, fine quality. Popular in Michigan.
Krummels (Krummels Late October)—Late, large, yellow,

freestone, one of the best late varieties.

Lemon Free-Medium late, lemon shaped, large, vellow freestone, excellent quality. Fine for canning.

Lemon Cling-Late, large, cling, yellow.

MAMIE ROSS-Early, semi-freestone, large, white, good flavor. Mamie Ross is better and larger than Carman and is replacing Carman in commercial orchards.

Matthews Beauty-Mid-season, yellow, freestone, good

Mayflower-Very early, cling, small size, white.

Muir-Yellow. California canning peach.

Mountain Rose—Early to mid-season, large, white free-stone, good flavor. Old time variety. Niagara—Mid-season, very large, yellow, freestone.

New Prolific-Late mid-season, large, yellow, freestone.

Old Mixon Free—Mid-season, large, white, freestone. Phillips Cling—Late, large, cling, yellow. Popular California canning peach.

Primrose-Mid-season, freestone, yellow, new variety.

Ray-Mid-season, large, white, freestone, excellent flavor, highly red colored. One of the best peaches for home use or roadside markets.

ROCHESTER-Early, mid-season, large size, yellow freestone, good flavor, prolific bearer. Popular in Western New York.

Radiance-Early, white freestone-new variety.

Red Bird Cling (Early Wheeler)-Very early, large, white, cling with bright red blush.

Salberta-Late, large, yellow, freestone. Popular in Ohio. Salway-Late, extra large, yellow, freestone.

Shippers Late Red—Late, large, freestone, yellow flesh with brilliant red blush. A new variety of prominence in West Virginia.

South Haven-Early mid-season, large, yellow freestone, heavy bearer. A new Michigan variety.

SLAPPEY-Early mid-season, yellow freestone, medium to large size, extra good flavor. The best early yellow variety grown.

Triumph-Early, yellow, freestone.

Yellow St. John-Early, medium size, freestone, heavy bearer.

White Heath Cling (Heath)-Late, very large, white, cling, a favorite for canning.

Wilma-Late, large, yellow, freestone.

### HARRISON GROWN GRAPE VINES

Premier garden fruit. No part of the fruit garden yields are richer harvest than the vineyard. Agawam—Deep red, large berries aromatic flavor.

CONCORD-Too well known to need much decription, as Concords are grown in almost every home garden and vineyard. Probably it is the most popular variety and has an unusual wide range of territory. The big, dark purple bunches are most enticing and sell on sight. Best commercial variety.

Plant Grapes for Profit

#### GRAPE VINES (Continued)

Catawba-Red, large clusters, medium size fruit.

Delaware—Bunches medium size, full of large red berries, which are sweet and of extra good quality. Ripens after Concord.

Moore's Early—Extremely dark purple, almost black. Bunches medium size, but the berries are large. The skin is thick, so that the bunches can be handled and shipped without serious damage. Early August.

Niagara—The best of the standard, light colored Grapes. The berries are greenish white, changing to pale yellow when fully ripe.

Worden-Resembles Concord and ripens about a week earlier.

#### HARRISON GROWN ASPARAGUS

The preparation of the bed should be made in a most thorough manner, as it is to last for a number of years. A deep, sandy loam with an abundance of decayed organic matter is the best soil.

Planting is best done in the spring as early as the soil can be worked in good condition. Run furrows with plow and clean out with shovel to a depth of 1 foot. Place well-rotted stable manure thickly in the trench, then just a slight covering with the soil, on top of which place the crowns about 2 feet apart, spread out the roots and cover them very shallow. After the plants start to grow, work the soil to them gradually until it

#### ASPARAGUS (Continued)

becomes level. The plants should be frequently cultivated and kept clean. The dead tops should be mown off in the fall and furrows should be thrown on the rows from each side and the middles cleaned out. This will cause the bed to warm up early in the spring.

BARR'S MAMMOTH-Early, large, fast grower. An old favorite.

Conover's Colossal-A rapid growing variety and often ready for cutting the second year.

Giant Argenteuil-Earliest, extra large stalks, rich and tender.

PALMETTO-Ten days to two weeks earlier than most other varieties. The stalks vary from dark to light green, are quite large and of exceptionally good quality. The old reliable commercial variety.

WASHINGTON-Rust Resistant, large stalks, good commercial variety.

#### PRICES TWO-YEAR GROWN

50c for 10; \$2.00 for 100 crowns; \$10.00 per 1,000 crowns; 2,000 to 5,000 at \$9.00 per 1,000 crowns; 5,000 to 25,000 at \$8.00 per 1,000 crowns.

Mary Washington-60c for 10 crowns; \$2.50 for 100 crowns; \$12.00 per 1,000 crowns; 2,000 to 5,000, \$11.00 per 1,000 crowns; 5,000 to 25,000, \$10.00 per 1,000 crowns.

Mary Washington is the best and latest strain of Washington Rust Resistant Asparagus development. Grown from selected strains direct from Dr. Norton and Crocker.

#### PLANT ASPARAGUS BY THE ACRE

#### BLACKBERRIES

Blowers-Black, large berries, fine quality, very prolific, good shipper.

Early Harvest-Black, very early berry, ripening from 10 days to two weeks before any other. Bears full every year. Excellent quality, good size, a valuable berry for early market. Sells at fancy prices.

ELDORADO-Berries of enormous size and shiny, jetblack, vines are strong, vigorous, and rarely fail to

produce abundant crops.

#### BLACKBERRIES (Continued)

Merseieau—Brilliant black, very large berries, extra good quality, strong grower.

Snyder-Black, early, medium size, sweet berries. Enormously productive, old favorite commercial variety.

10 to 29 plants, 7c each; 30 to 299 plants, 5c each; 300 to 599 plants, 4c each; 600 to 3,000 plants, 3½c each.

#### CURRANTS

Fay (Fay's Prolific)—Red, mid-season, large berries, good flavor. Excellent for jams, jellies and preserves.

Wilder (President Wilder)—Red, late, extra large, juicy berries, high quality. Best variety grown.

1 to 9 plants, 25c each; 10 to 29 plants, 20c each; 30 to 299 plants, 15c each.

#### DEWBERRIES

LUCRETIA—Fruit jet-black, larger than other varieties. By many growers is considered as the best. Plant a srong grower and bears enormous crops.

10 to 29 plants, 4c each; 30 to 299 plants, 3c each; 300 to 599 plants, 2½c each; 600 to 3,000 plants, 2c each.

#### GOOSEBERRIES

Downing-Large, handsome, pale green, good quality for table and cooking. Strong grower.

Houghton—Round, medium size, pale red, sweet, very good flavor; very prolific bearer.

1 to 9 plants, 25c each; 10 to 29 plants, 20c each; 30 to 299 plants, 15c each.

#### RASPBERRIES

Columbian-Purple, very large, excellent for canning.

CUMBERLAND—Black, large, firm fruit, very heavy bearer. Popular commercial variety.

CUTHBERT—Crimson red, large conical berries, very hardy, strong grower, prolific bearer. Leading commercial variety.

King-Red, early, large berry, good shipper.

Gregg-Black, large, very productive. An old popular commercial variety.

Latham — Red, large berries, perfectly hardy, heavy bearer. Remarkable new variety.

Plum Farmer—Black, large, thick meated berries—entire crop matures about the same time.

#### RASPBERRIES (Continued)

ST. REGIS (Ranere)—Red, large berries, everbearing, fruit commences to ripen with the earliest and continues on the young canes until October and sometimes later. Attractive berries, firm, very prolific bearer, excellent shipper. Best commercial variety.

#### PRICES ON RASPBERRIES

10 to 29 plants, 6c each; 30 to 299 plants, 5c each; 300 to 599 plants, 4c each; 600 to 3,000 plants, 3c each.

Luscious Strawberries.

#### **STRAWBERRIES**

No home garden is complete without a collection of Strawberries. We have reduced the number of varieties, yet we have retained the cream of the list.

Fall Shipments start October 15th, Southern Shipments throughout winter. Spring Shipments any time customer desires until May 15th.

#### EARLY STRAWBERRIES

Campbell's Early—Has "made a hit" with growers in New Jersey, productive and profitable.

Klondyke—Uniform, shapely, rich dark red, mild and delicious, juicy and handsome; sell quickly. Plants are tall, compact, stalks strong; leaves light green. Abundant runners. Yields are wonderful. Blossoms are perfect, but do not fully fertilize themselves and need other sorts near. Name is suggestive of results often a gold mine. Our best paying early berry.

Missionary—Early, medium size; good color, fine flavor.
Popular commercial variety in Florida and Eastern
Shore of Maryland.

Premier or Howard 17—Extra early. Fruit large, deep red clear through to the center. For home use and markets.

Warfield—Early. Rampant grower, with many runners: Berries glossy, dark red, rich, exceedingly juicy.

#### MIDSEASON STRAWBERRIES

Big Joe—Brilliant red, with bright green calyx; flavor delicious; splendid for table or preserving.

Bubach—Large size and handsome color are its most valuable characteristics. Color is a beautiful bright red.

#### STRAWBERRIES (Continued)

- Glen Mary-Strong, upright, large, dark green foliage. Produces remarkable crops when planted in rich ground.
- Haverland-Medium-early variety, fine appearance. Berries are medium to large, rich, bright red.
- Lupton-In favor with Northern markets: good size: bright color.
- New York-Popular for home gardens and nearby markets: large, few seeds, very sweet.
- Parsons Beauty or Gibson-Begins to ripen at midseason and continues until Gandy comes in. Dark red, thick, blunt, mild.

#### LATE STRAWBERRIES

- Aroma-Late. Strong, sturdy plants; abundant crops nearly always, even if weather and soil are unfavorable.
- Chesapeake-Late. Fruit uniformly large, firm, and without green tips; does best in rich, damp land.
- Gandy-One of the latest Strawberries. Brings the very highest prices, and yields tremendous crops of quality that leaves nothing to be desired in flavor, texture, color and keeping qualities. Bright red, smooth surface. Foliage broad and dark green. Borne on long, upright stems, well above the leaves and dirt.

#### EVERBEARING STRAWBERRIES

		25	100	500	1000	
Progressive	(perfect	bloom)\$ .50	\$1.30	\$5.00	\$8.00	
Mastodon		1.00	3.00	10.00	******	

#### EVERBEARING STRAWBERRIES

- Progressive-Pre-eminently a home garden berry; fruit may be shipped short distances if properly packed. Method of raising is same as for the other sorts, excepting for the first season all blossoms that come before the first or middle of July should be cut off. .
- Mastodon-Large berries, productive everbearing. New variety worthy of trial.

#### OUR LIBERAL GUARANTEE.

All nursery stock is guaranteed to reach the customer in good condition. Accept shipment on arrival, examine and count stock and notify us at once should there be any error and same will be promptly corrected. Also notify the transportation company should stock appear to have been damaged in transit. We do not guarantee continued growth. A tree, shrub or plant is a living organism—it breathes, drinks and feeds and is liable to attacks of disease and insects after being transplanted to the customer's grounds. Our selling prices are very low and we cannot guarantee growth or be responsible for the nursery stock after delivery to our customers in good condition.—HARRISONS' NURSERIES.

NON-WARRANTY.—In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untrueness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, expressed or implied, as to description, quality, productiveness or any other matter.—HARRISONS' NURSERIES.
